

STAT8008 - Time Series and Multivariate Analysis

CRN 25855

Contact: justin.mcguinness@cit.ie

This module provides methods to develop and critically evaluate multivariate regression models and time series models. To view the module descriptor, click [here](#)

Among the many topics covered are:

Assumptions underlying multivariate regression and time series models;

Residual analysis and tests of fit of linear and non-linear models;

Regression and time series models for prediction;

Use of SPSS to generate and analyse models.
