

# STAT8008 - *Time Series and Multivariate Analysis*

CRN 24521

Contact: [justin.mcguinness@cit.ie](mailto:justin.mcguinness@cit.ie)

This module provides methods to develop and critically evaluate multivariate regression models and time series models. To view the module descriptor, click [here](#)

Among the many topics covered are:

Assumptions underlying multivariate regression and time series models;

Residual analysis and tests of fit of linear and non-linear models;

Regression and time series models for prediction;

Use of SPSS to generate and analyse models.
